### In the United States Patent & Trademark Office

January 21, 2004

In re Application of: Mr. Blair J. Poirier

For: Potable Water Circulation System

Filed: Enclosed herewith, as a CIP of S/N 10/098,539, filed on March 18, 2002

### PETITION TO MAKE SPECIAL

Mail Stop Patent Application  
Commissioner for Patents  
P.O. Box 1450  
Alexandria, VA  
22313-1450 USA

Hon. Commissioner:

The Applicant respectfully requests the Commissioner to make this application special and to advance its examination ahead of its normal turn, under the provision of 37 CFR 1.102 (c).

The systems and methods for circulating water in a piping system according to the present invention represent a great advance in the science of potable water distribution. These systems and methods offer a long-sought solution to water stagnation in a municipal water distribution system. Therefore, this invention will materially enhance the quality of the environment. Most importantly, the systems and methods according to the present invention will enhance the health, and the overall quality of life of those being supplied in water from a distribution system having one of these systems or methods. It is truly believed that an early examination of this application and the publication of a patent for the systems and methods according to the present invention will allow an early commercialization of this invention, to the benefit of the public at large.

Respectfully submitted,

Mario Theriault, P.Eng.  
Patent Agent for Applicant  
Reg. No. 40,368
